

What: Official World of Concrete Press Conference
 When: Wednesday, February 4, 2009
 Where: **At the Sky Climber Exhibit Booth # S 12319**
 World of Concrete
 Las Vegas Nevada
 Why: FIVE (5) New Products – Introduction

THE FUTURE IS NOW in Suspended Access Equipment

Since 1955, Sky Climber has been the leading developer of suspended access equipment. Now, in 2009, we have just raised the bar. At this year’s World of Concrete, Sky Climber is introducing five new and exciting products to the commercial and industrial markets.

Going against the trend of spending for R&D, Sky Climber has made significant investments in developing innovative products that provide competitive advantages to our dealers and end users through advanced technology and design.

While the industry waits for an economic recovery, Sky Climber has boldly brought the industry new products that will have a substantial impact in the industry.

Come to our exhibit booth and spend 15 minutes with us. Allow us to show you the future!!! FNX technology unsurpassed world wide... Never seen before technology...

When the press conference is over, if you would like to ride on the “future”, “suit up” and we’ll take you up on the “Sky Master”.

Press Kits including electronic data will be provided to each Press Member attending. Press photographers are welcomed. We look forward to seeing you there. If you would like to schedule an interview prior or after the conference, please contact Jeri Sluder, 740 203 3930 or 740 815 4707.
